Skills

The know-how matured till now become valuable tools for consultancy. The Technical Department, composed of specialized technicians, guarantees timeliness interventions of maintenance. The presence of all the national territory is guaranteed by a network of technical and operational teams, to ensure the best service even with warnings of a few hours. All staff and services are constantly monitored by the Central Office, 24-hour a day, 365 days a year, which coordinates and manages all activities and supervision according to precise needs of the customer.

Parking management

Parking management is the organization of private land adjacent to facilities open to the public, such as supermarkets, shopping centers, hospitals, bathing beaches, nightclubs, temporary events, etc. to coordinate in an efficient, orderly and safe parked cars and the flows of entry and exit based on the needs of the customer who will derive the most benefit. A parking area is also well organized one important sales tool that can influence the sales of up to 10%; In fact, customers will be more tempted if they will always find a free parking space at their disposal.

Felix srl

A unique partner for all your needs

MANAGEMENT WITH OVERSIGHT

Access control, coordination, traffic routing and surveillance are made with qualified staff, courteous and competent, multilingual if necessary, present both in incoming way and outgoing way; useful for short periods and areas where it is not possible to install automatic parking systems.

SEMIAUTOMATIC MANAGEMENT

One of the two fluxes (Input or output) is controlled by the staff, while the other to an automatic barrier. This solution has for example entrance through a barrier with the print of ticket reporting ingoing time, and the way out controlled by the guardian; useful in supermarkets where the the customer has the right to park for free when does shopping.

AUTOMATIC MANAGEMENT

All ways are regulated by an automatic park system with automatic cash and remote issues management Central Office or nearby personnel. In this way any staff if present can be referred to a specific job such as customers welcome, aiding for the maneuvers, or simple surveillance for the purpose of safety.

Technical assistance

For existing automations or for products installed by us; our company is able to provide complete maintenance to almost any automatic and semi-automatic machines, of all brands.

Felix srl

Automatic parking systems

AUTOMATIC SYSTEMS

Automatic parking systems are indispensably, useful and functional, and are always subject to customers use that does not always understand the functions, bad weather and often to vandalism, with frequent service interruptions. The best way to ensure the correct functionality is to constantly checks of our technicians that prevent various drawbacks happenings that could cause the block, often for trivial reasons, and repair any issue. The timing of the interventions is fully customizable from 4 to 150 annual visits.
